SKMB provides support to Gateway community Church after flood.

In the summer Gateway community Church in Canora experienced heavy flooding in the basement of their facility. The water reached nearly 12 inches causing extensive damage. Once the water was cleared, mold began to form. The water impacted several mechanical pieces in the basement like their furnace. Unfortunately, they had no insurance coverage for flooding and so they had to carry the weight of the cleanup and restoration. SKMB provide \$1500 in immediate support with a commitment to revisit their needs situation in the fall.
